

**TRANSFER EXPRESS**

Specialization **Transportation** People

**TRANSFER-EXPRESS is a new quality in the TSL sector.**

We used our experience to create a unique and complete offer in the transport services market.

The combination of long-term practice, a team of specialists and a modern fleet guarantee on-time deliveries as well as the safety and flexibility of every order.

**TRANSFER-EXPRESS is not just another carrier, but a real leader in the TSL industry.**

**Check out what value you will get.**

## PROFESSIONAL PARTNER

### **Is this right for me?**

*Yes, if you value the responsibility, efficiency and punctuality of your contractors. We are well aware that there is no currency more valuable than the trust of customers.*

### **What will be the effect?**

*You will get peace of mind. You hand over the cargo into the hands of specialists, then the next feedback you get is the confirmation of effective freight delivery, and you can focus on your core business only.*

### **Can we be trusted?**

*You bet! This is proved by six years of experience, a full package of necessary permits and professional licenses, as well as a Certificate of Business Credibility, an international ISO 9001:2015 certificate and the TSL-EUROPEAN main award!*

### **Does it pay off?**

*We optimize all activities economically. What does this mean in practice? Full cargo protection, express delivery, proven routes and a customized fleet. This strategy eliminates additional costs and creates space for handling further orders.*

# UNIVERSALITY

For TRANSFER-EXPRESS, the priority is a continuous improvement of qualifications, infrastructure and working tools.

**The TSL sector fluctuates dynamically, which is why we have created a flexible system comprising:**

## THE AREA

We provide our services all over Europe. We have a database of contracted partners who meet stringent standards.

## CARGOS

Neutral and hazardous materials, waste, high-value cargo and freight with specific transport requirements.

## SECTORS

AOG, automotive, pharmacy, fashion, healthcare.

## FLEETS

Vans, trucks (solo), standard trailers, sets.

## DRIVERS

Double manning, ADR, waste.

## SECURITY

We systematically improve the security of the goods we transport, which guarantees full effectiveness of delivery.

We maintain a carrier's third-party liability policy with coverage totalling EUR 1,200,000 per incident! We also have full insurance for cabotage within the European Union.

**We also focus on the transport of High-Value cargo.**

### IN ADDITION:

- **An extensive list of guarded parking lots**
- **Constant GPS monitoring**
- **Regular fleet modernization**
- **Comprehensive staff training**

An isometric illustration of a logistics operation. On the left, a person stands next to a large monitor displaying a map and data, with several cardboard boxes nearby. In the center, a worker is on a ladder next to a tall shelving unit filled with boxes. On the right, a blue truck is parked with its back open, and several workers are handling boxes and pallets. The scene is set in a dark, industrial environment.

# COMMUNICATION

Efficient information is crucial for the effective logistic process. This is why we ensure communication at every stage of transport!

---

## TRANSPORT

---

Our drivers use the cutting edge Dynafleet Online Volvo system, which ensures constant contact with the cargo and remote access to all transport documents. We have full control over it!

---

## WAREHOUSING

---

We have warehouse facilities in the direct vicinity of the most important European routes. We offer a comprehensive range of reloading, storage and final delivery services. A solution dedicated to the automotive, pharma, fashion and healthcare industries.

# FLEET

The fleet of vehicles is the pride of TRANSFER-EXPRESS. That is why we follow two rules here: annual modernization of the technologies we use and perfect technical condition of vehicles.

All vehicles are XL Code certified and comply with the highest emission standards, which ensures environmental protection.

---

In addition to neutral goods, we transport hazardous goods (up-to-date training and ADR licences) and waste (Poland, Germany, Belgium, the Netherlands, Italy).

**Note: We use only our own fleet and contracted carriers, so you will not find your cargo on any freight exchange!**

---

Get your access to:

- 206 Express vans of up to 3.5T payload capacity
- 157 road trains of up to 24T payload capacity
- 49 13.6 Mega trailers of up to 24T payload capacity
- 12 road trains of up to 12T payload capacity

**TRANSFER EXPRESS**

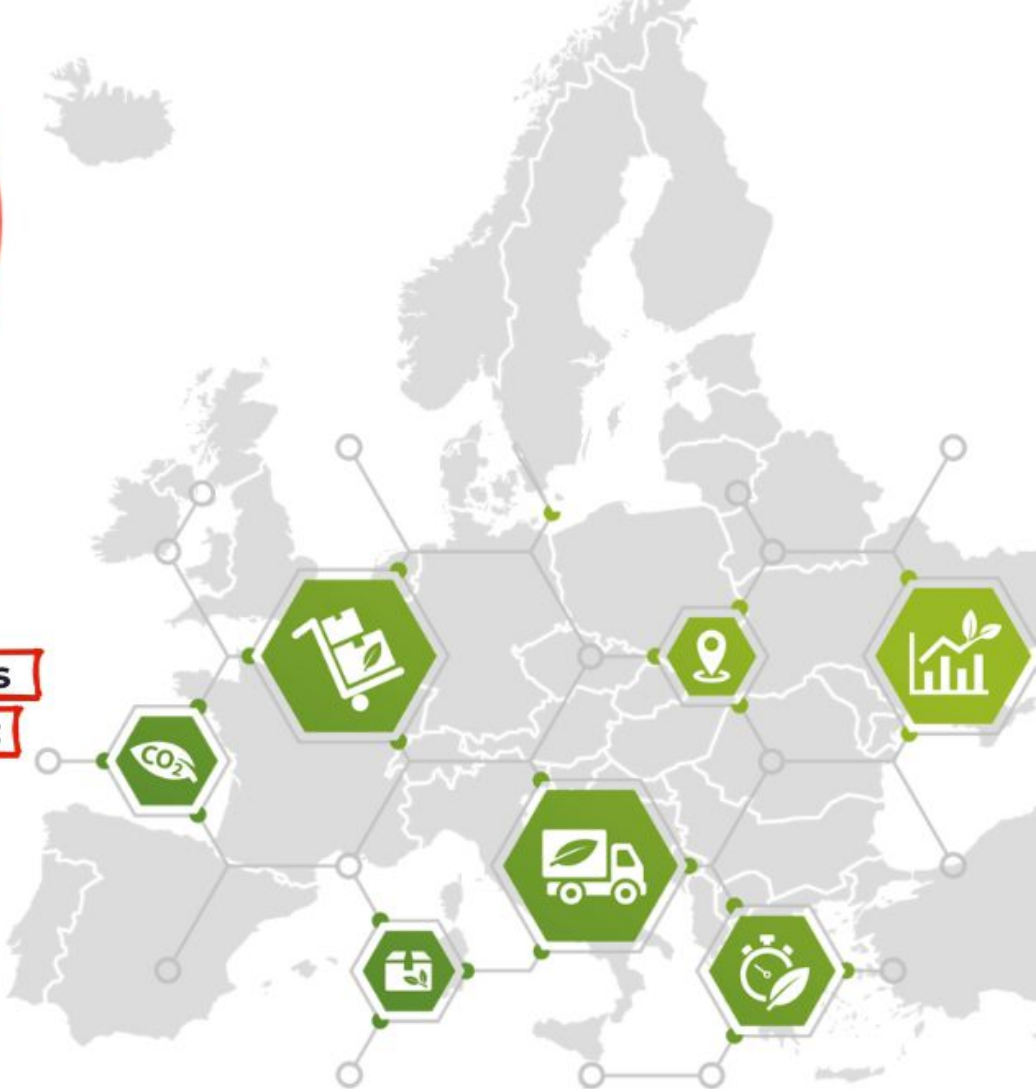

# ECOLOGY

Environmental protection is intrinsic to a professional transport company.

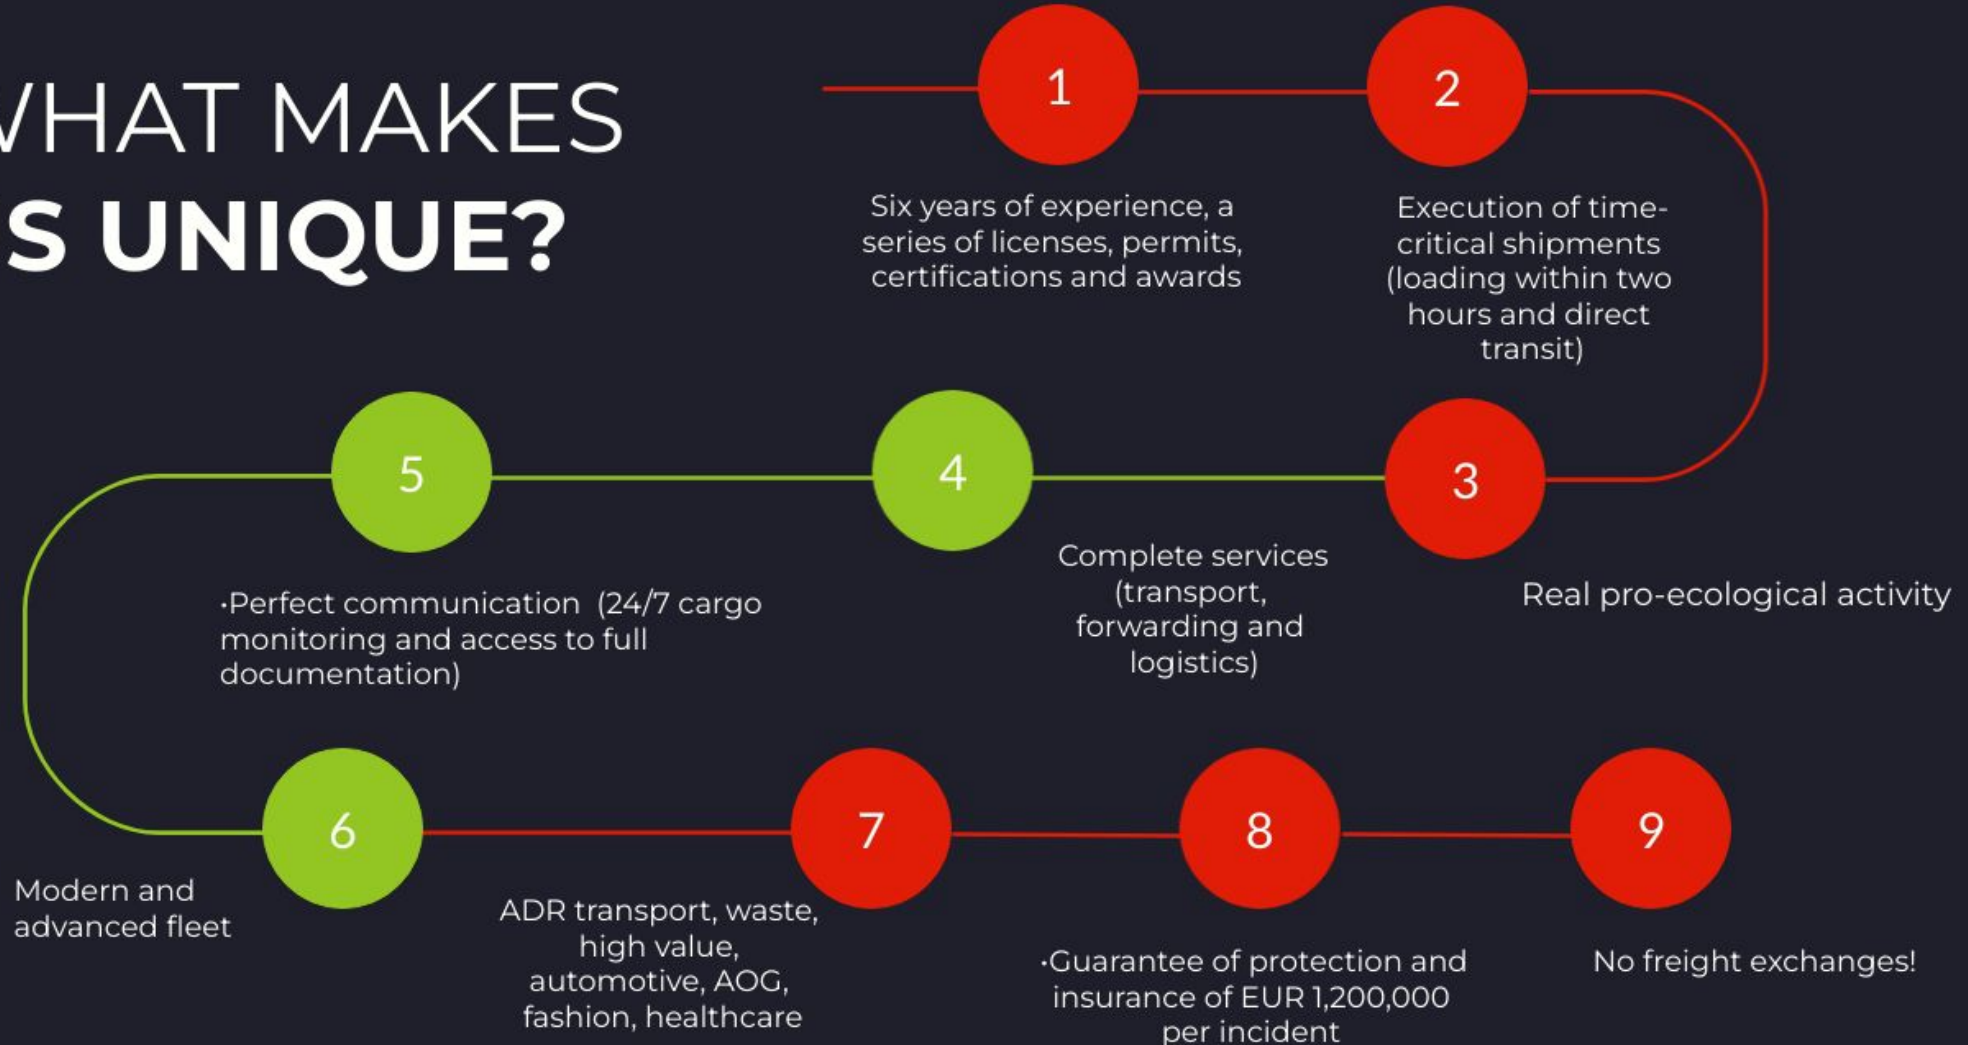

**To that end, we have implemented special procedures that combine order efficiency and ecological support:**

- Fleet able to use alternative sources of fuel
- Route optimisation
- Photovoltaic panels in warehouses and offices
- A restrictive selection of contractors
- Training and certifications
